DETAILED ACTION

The previous election of species requirement is hereby vacated. An action on the merits of all claims is being given.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 3-6, 8-11, 13-16, and 18-22 are rejected under 35 U.S.C. 102(e) as being anticipated by Kushion et al..

The patent to Kushion et al. '399 discloses a device and method for limiting the current and voltage for an electric machine as described in columns 2-4. As shown in Figure 4 the command voltage is copensated for in levels 31 and 2 to adjust the dead time depending on load condition. The maximum voltage for each load condition is adjusted in these steps.

Claims 2, 7, 12 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
